## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, 13, 16, and 21-24, drawn to an exhaust gas aftertreatment system and method with engine fuel, air, or ignition controlled by sensor of reactor condition, classified in class 60, subclass 285.
  - II. Claims 12, 14, 15, 17, and 18, drawn to a charge forming device or method including exhaust gas condition responsive means combined with engine condition responsive means such as engine load responsive means, classified in class 123, subclass 681.
  - III. Claims 19-20, drawn to poppet valve operating mechanism and method with means for varying timing, classified in class 123, subclass 90.15.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I, Group II, and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. In Group I, the function is to adjust an engine operating parameter such as an engine air-fuel ratio and ignition timing based on a condition of a catalyst provided by an exhaust gas sensor. In Group II, the function is to adjust an engine operating parameter such as an engine air-fuel ratio based on an engine load

change. In Group III, the function is to adjust the timing of engine intake and exhaust valves based on the pressure conditions in the intake and the exhaust manifolds. Thus, the functions of the inventions of Group I, Group II, and Group III are clearly different.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Kevin A. Wolff on September 14, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
